## Architects, Building Designers and Surveyors...

Choice Solutions and Masterwall recently addressed all the Building Surveyors in Tasmania at a recent seminar, pointing up the need of compliancy and also where we are in the building industry as having unprecedented levels of certification and that there are also totally uncertified systems still flying under the radar in Tasmania, this is being seriously addressed by Building Surveyors and they were also greatly warmed by Choice Solutions having installers which will be become "accredited Masterwall installers".

The training for these installers is underway at the moment.
